About Partner Readiness Repository

The Partner Readiness Repository is a public GitHub repository containing documents, links, videos/demos, and other assets for partners.

About Partner Readiness Academies

The Partner Readiness Academies features videos/demos, hands-on labs, learning paths, and other assets from GPSUS architects.

Wondering how to get started?

Prerequisite: Social or Microsoft GitHub Account

1. Navigate to the Partner Readiness Repository here [Microsoft Partner Resources](#) to find desired edits or changes.
2. To begin desired **small edits**, such as updating links or adding descriptions, select the **Edit this page** button in the top right of the desired page.

- [Edit this page](#)
- [Create documentation issue](#)
- [Create project issue](#)

Contribution Guidelines Continued

1. Before proposing changes, **fork** the Partner Readiness Repository by selecting **Fork this repository**.

You need to fork this repository to propose changes. able to edit this repository directly—you need to fork it and propose your changes

2. If unable to do so, **fork** the Partner Readiness Repository by navigating here [microsoft/PartnerResources \(GitHub\)](#) and selecting the **Fork** button in the top right.

3. Make edits directly in the GitHub UI and select **Preview** to see changes before completing.

[PartnerResources](#) / [_docs](#) / [Skilling](#) / [Microsoft Security Academy](#) /

4. Curious how to contribute? Explore the [GitHub Markdown Cheat Sheet](#).
5. Once changes are complete, navigate to the bottom of the page under **Propose changes**.

Contribution Guidelines Continued

Propose changes

Added New Link

Added a new link for a Defender for Cloud Demo.

Propose changes Cancel

7. A brief title is required, and additional description details are encouraged but optional. Once reviewed and completed, **Propose changes**.
8. See **Advanced Contribution Guidelines** below for further monitoring/preview capabilities.
9. Verify the changes can merge and select **Create pull request** to the right.

Comparing changes

Choose two branches to see what's changed or to st

10. Ensure to keep **Allow edits by maintainers** checked.

Attach files by dragging & dropping, selecting or pasting them.

Allow edits by maintainers ?

11. An admin. will approve your request or reach out if there are issues.

Are you an advanced user?

GitHub features convenient capabilities for monitoring and previewing edits or changes.

1. Navigate to your **fork** and the home page/**Code** to ensure it is synced with the main branch.

2. If your **fork** is behind commits, click the **Sync fork** button to the right then select **Update branch**.

3. To visualize edits or changes, navigate to the **Settings** tab and click **Pages** to the bottom left.

Advanced Contribution Guidelines Continued

4. Setup your own live site to preview changes before submitting a **pull request** to the main branch.
5. Once established, select the **Visit site** button to the right under GitHub Pages.

6. The site is your **fork's** own identical copy of the main repository site, allowing you to preview small edits or sizeable additions before submitting a **pull request** to the main branch.

Advanced Contribution Guidelines Continued

7. To monitor the progress and status of **Commits** or **Syncs**, navigate to the **Actions** tab on the home page. As a reminder, changes commonly take five minutes to build and deploy.

8. If you request substantial changes or edits, such as adding a new Partner Academy or Readiness Resources solution area, please contact the **GPSUS Skilling & Enablement Team (SET)**.
